

CLINICAL OBSERVATION

In this section, we highlight the human side of clinical academic medicine, putting a few questions to a physician at DMS-DHMC.

Kay Hillinger, M.D.**Assistant Professor of Medicine**

Hillinger specializes in allergy medicine and clinical immunology. She has a particular interest in urticaria (hives) and allergic rhinitis. She has been on the DMS faculty since 2003.

When did you decide to become a physician?

In 1969, when I was a second-year college student. I had a summer job in the microbiology lab at the local hospital in my hometown of Monroe, La. Women physicians were a minority then (less than 10% of the students in my medical school class were female). I remember being asked during my medical school interview if, in my third year of school, I decided to get married whether I'd continue medical school or

drop out. It's unthinkable to imagine that question being asked today.

What's the last movie you saw?

The King's Speech. I'm interested in English history, especially during the World War II era,

and I thought it was a great story. It's about a man who never expected to be king and how he was able to overcome a speech impediment so he could do radio broadcasts to his people during that awful time.

If you invented a time machine, where would you go?

To London in 1940 during the Battle of Britain. There was such a courageous, united effort on the part of the British people during that time to keep the enemy from occupying their island.

What three people would you like to have over for dinner?

Winston Churchill, Thomas Jefferson, and Leonardo da Vinci, all of whom I admire very much.

Do you use Twitter, Facebook, or other social media?

I do use Facebook, mainly to keep up with my family, all of whom live far from here. As to my impression of it, I'll put it this way: I'm glad Facebook wasn't around when my daughter was in high school.

What do family and friends give you a hard time about?

Not being very computer literate. I had never used a computer before coming to DHMC except to send an occasional e-mail. It was quite a learning curve for me.

Finish this sentence: If I had more time I would . . .

Travel and read more. I love to read and enjoy books and short stories about New Orleans and the rest of the South. Although not set in the South, one of my favorite books is *Grapes of Wrath*. I also enjoy books about animals.

What music is in your CD player or on your iPod now?

Mostly jazz, classical, and rock. I've always liked classical music, especially Bach and Mozart—I took piano and violin lessons for several years. Rock music, especially of the '60s and '70s, reminds me of my high school, college, and medical school years. I was a big fan of the Beatles and Stones (who wasn't then?). When I moved to New Orleans to attend medical school, I heard music by some of the best musicians anywhere—R&B, gospel, brass bands, Dixieland, jazz, the list goes on. I also think Cajun and zydeco music are great.

What is your most memorable accomplishment?

Becoming a physician. It's really the only career I ever seriously considered. On the personal side, raising a wonderful daughter with many talents and accomplishments.

What do you think makes for a successful physician?

Taking the time to listen to patients and using that information in formulating the diagnosis and treatment plan.

What was your first paying job?

Cataloguing books in my high school library.

**Worthy of note: Honors, awards, appointments, etc.**

Ethan Dmitrovsky, M.D., the Andrew G. Wallace Professor of Pharmacology and Toxicology, has been named chair of the National Cancer Institute (NCI) Board of Scientific Counselors for Clinical Sciences and Epidemiology. He will guide the 22-member board of physicians and scientists from cancer centers and universities around the country in advising the NCI's director and scientific leadership on the direction of cancer-related research. Dmitrovsky is also an American Cancer Society Clinical Research Professor, an associate director of the Samuel Waxman Cancer Research Foundation, and a member of the board of the Lance Armstrong Foundation.

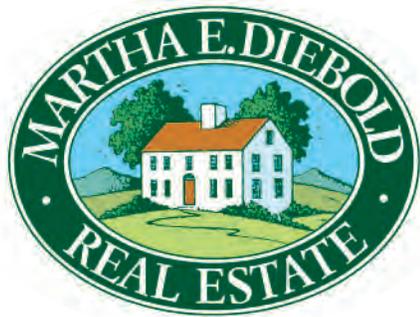

David Goodman, M.D., a professor of pediatrics, has been appointed to the national Council on Graduate Medical Education. The group assesses physician workforce trends, training issues, and financing policies and recommends appropriate federal and private-sector efforts on those subjects. In addition, Goodman was a co-author of a recent high-profile

Institute of Medicine report titled “The Future of Nursing: Leading Change, Advancing Health.”

John Wennberg, M.D., a professor of community and family medicine and the founder and director emeritus of the Dartmouth Institute for Health Policy and Clinical Practice, was honored by the New England Healthcare Institute as an “Innovator in Health.” He was recognized for his research on variations in the delivery of health care and for his efforts to make patients more active participants in their treatment.

Robert Zwolak, M.D., a professor of surgery, was appointed to the American College of Surgeons’ Governors’ Committee on Socio-economic Issues and, by the U.S. Government Accountability Office, to the Board of Governors for the Patient-Centered Outcomes Research Institute.

Jack Cronenwett, M.D., a professor of surgery, received the Julius H. Jacobson II Award for Physician Excellence from the Vascular Disease Foundation.

Marie Bakitas, D.N.Sc., an associate professor of anesthesiology, received the 2010 Brilliant Future New Investigator Award at the annual meeting of the Council for Advancement of Nursing Science.

Albert Mulley, M.D., has been named the inaugural director of the new Dartmouth Center for Health Care Delivery Science (see dartmed.dartmouth.edu/f10/f02 for details of the

Center). Mulley, who has been a Trustee of Dartmouth College since 2004, will step down from that position to take the new post. He will also resign from the Board of Overseers of DMS and the DHMC Board of Trustees. He was previously chief of the Division of General Medicine at Massachusetts General Hospital and is an expert in shared decision-making.

Stephen Bartels, M.D., a professor of psychiatry, was honored as a “champion for mental health” by Riverbend Community Mental Health of New Hampshire.

Robert Keene, D.M.D., an adjunct associate

professor of anatomy, was honored for his service to dentistry by the American Academy of Gold Foil Operators. He has served as the organization's president and for the past eight years as its secretary and treasurer.

Suzanne Boulter, M.D., an adjunct professor of pediatrics, received an Oral Health Service Award from the American Academy of Pediatrics.

Jennifer Bomberger, Ph.D., a postdoctoral fellow in the Dartmouth Lung Biology Center, received the Young Investigator Basic Science Award from the Cystic Fibrosis Foundation. Her research points to the possibility that a toxin released by the *P. aeruginosa* bacterium severely compromises the immune defenses of patients with cystic fibrosis.

Courtney Kozul-Horvath, Ph.D., a postdoctoral fellow in microbiology, received the 2010

Karen Wetterhahn Award from the National Institute of Environmental Health Sciences. Her research, funded under the Dartmouth Toxic Metals Superfund Research Program, involves the harmful effects of exposure to arsenic in drinking water.

Nathan Delault, a research associate in biochemistry, received the International Young Researcher Prize from the Alberta Prion Research Institute. A paper he authored was singled out as having the most innovative findings and likely future impact on the field of prion science. He works in the lab of **Surachai Supattapone, M.D., Ph.D.**, a professor of biochemistry.

Linda Piotrowski, M.T.S., a pastoral care coordinator and chaplain in DHMC's Palliative Care Service, received top honors from the Advocating for Clinical Excellence Project, funded by the National Cancer Institute, for her efforts to improve the delivery of palliative care.

Ann Laumann, A.P.R.N., a pediatric nurse practitioner at Dartmouth-Hitchcock Mascoma, received the New England Rural Health Roundtable Rural Health Clinician award.

Danielle Salvas, R.N., a nurse in DHMC's Pediatric/Adolescent Unit, was named New Hampshire Direct Care Nurse of the Year.

The Centers for Disease Control and Prevention cited Norris Cotton Cancer Center's **Colorectal Cancer Screening Program** as a best-practices model to increase colorectal cancer screening and thus prevent colorectal cancer. ■
